

Sizing, Shrinkage, and Care Instructions

Because our shirts are 100% cotton, we allow for *shrinkage of one half inch in the collar and one inch in the sleeve*, with normal commercial laundering.

Whether laundered commercially or at home, please run our shirts through a hot water and tumble dry cycle a couple of times to ensure proper size. Most shrinkage will occur with these initial launderings.

After initial shrinkage, we recommend:

Hand or machine wash, warm water.
Drip or tumble dry, regular setting.
Cool iron. No bleach. Do not dry clean.

If your shirts fit perfectly out of the box, launder *in cold water* and hang dry *to prevent any shrinkage* and sizing issues. Commercial laundries will use cold water, upon request. We can adjust your sizing in any future orders.
